## THE GEO-LOGICAL

# TREAD LIGHTLY™ PROGRAM

Tread Lightly™ is a reflection of our commitment to provide industry leading customer service. This unique white glove service is your assurance that we will do everything possible to minimize the impact of heavy construction on your landscaping and the environment. To achieve this level of service we have purchased state of the art equipment that allows us tighter access while making a smaller footprint. We exclusively use the mud rotary method of drilling, which allows us to recycle the drilling fluid. This means your lawn stays dry and will not be destroyed during the process of repair.
